OFF-PREMISE INFRASTRUCTURE FOR SCALING RESTAURANT BRANDS

Standardize Pickup. Protect Margin. Control the Last 10 Feet.

Patented restaurant pickup infrastructure combining insulated, code-authenticated compartments with operational software. Proven across 42,000+ automated pickups in three states, The Yummy Box standardizes the final physical handoff for direct customers and third-party couriers while reducing manual interruptions and documenting pickup activity.

Patented Controlled Pickup Infrastructure (U.S. Utility Patent 10,997,548 B2)

The Yummy Box closes the Last 10 Feet between digital ordering and verified physical pickup.

01 THE OPERATIONAL BOTTLENECK

Open pickup shelves leave paid orders exposed to theft and wrong-bag grabs. Paper sign-out sheets may provide limited evidence during delivery disputes, while manual verification interrupts staff. The Yummy Box restricts unauthorized pickup access, creates timestamped custody records, reduces manual handoffs, and provides evidence to support delivery dispute investigations.

02 LIVE FLAGSHIP PROOF | GATLIN'S BBQ, HOUSTON

- **42,000+ automated pickups** across historical deployments in three states.
- **74% shorter observed handoffs:** Approximately 45 seconds through The Yummy Box versus 2 minutes 51 seconds in the comparison sample.
- **$480,823 estimated order value handled:** 27,335 controlled pickups documented in the historical Gatlin's dataset (through 2025).
- **$501,667 estimated direct-channel order value:** 28,520 first-party orders documented.
- **81.5% automated completion rate:** 4,548 of 5,578 completed Gatlin's orders through November 24, 2026, were completed through the automated workflow without a recorded manual handoff.

03 WHY SCALING BRANDS STANDARDIZE

- **Controlled Physical Custody:** Code-authenticated compartments replace unattended open-shelf pickup access.
- **Standalone Operations:** Deploy independently of POS integration; evaluate native-app connectivity separately.
- **Insulated Polymer Construction:** Polywood-based cabinet with compartment insulation and exterior electronic smart locks.
- **Multi-Location Visibility:** Operational software records pickup activity, timestamps, and location-level performance.
- **Dispute Evidence:** Timestamped pickup records and supporting fulfillment documentation for delivery dispute investigations.

04 TRANSPARENT FLAT PRICING

- **Standard Deployment:** $5,000 per custom-branded station; limited, qualification-based flagship offer at $2,500 per station.
- **One-Time Setup & Onboarding:** Quoted per location; flagship terms subject to confirmation.
- **Monthly Platform & Automation:** Proposed $248.99/mo ($99.99 software + $149 automation); final subscription, launch and contract terms established in the written agreement.
- **Third-Party Delivery Included:** Station-based third-party pickups at $0 additional processing fee under the proposed flat-rate model.
